Ripe amalaki fruit ready to be picked

Amalaki fruit is hand picked at the peak of ripeness.

Ripe fruit insures that the amalaki contains a complete and unparalleled spectrum of powerful anti-oxidants, polyphenols, bioflavonoids, amino acids, trace minerals, and phytonutrients

Amalaki

During colonial times the British referred to the amalaki fruit as the "Indian gooseberry". It is a small, greenish-yellow spherical fruit with a bitter-sour taste. A medical doctor, health expert, notes that, in addition to its ancient use in Ayurvedic medicine, it has been studied in both cancer & heart disease, with promising results*.

He goes on to state, "Several studies have also shown amalaki to be effective in lowering serum cholesterol levels & showing antibiotic activity against a wide range of bacteria."* Amalaki has the phytonutrient phyllembin which has been studied by scientists.

It is indigenous to India and all elements of the fruit including the seeds, outer pulp portion and rind are used in natural medicine. It is a very high source of vitamin C. In fact, it is documented that the amalaki fruit, on a per pound basis, is the world's richest source of vitamin C.

Indian gooseberry has been used as a valuable ingredient of various medicines in India and globally for many, many years.

The Original AMALAKI™

Zrii, the power comes from the perfect marriage of natural resources, the wisdom of ancient Ayurveda, and the knowledge of state-of-the-art Western medical science. **Here are seven of its benefits:**

Amalaki, the great rejuvenator. Central to Zrii is a small fruit that grows at the base of the pristine Himalayas in northern India. Its nutritional profile is outstanding.

Taking nutrition to the next level. Mixed only with fruit juices, amalaki would be a top nutritional drink. But we created a synergistic blend of herbs and fruits to completely unlock the potency of amalaki.

Preservative-free. Zrii uses the world's purest whole-food source of

amalaki—no harmful artificial chemicals or contaminants.

Wildcrafted in the Himalayas Our amalaki is wildcrafted, a technique where the fruit is hand-picked according to ancient ways.

Zrii is proudly endorsed by the Chopra Center for Wellbeing, founded by world-famous Dr. Deepak Chopra and neurologist Dr. David Simon.

A vibrant taste. In Ayurvedic practice, the ability of a drink to "enliven the tongue" is a hallmark of its healing capabilities. Ask those who have tasted it; Zrii most assuredly enlivens the tongue.

The wisdom of Ayurveda. The formulation for Zrii is built on 5,000 years of Ayurvedic wisdom.

Rejuvenating

For many, drinking Zrii provides a sense of rejuvenation. No surprise, since recent studies have shown that amalaki just might be the world's most rejuvenating superfood, with the potential to increase overall health, vitality, and radiance at core level.

A Better Formulation

After referring to ancient texts & contemporary research, the Zrii formulation team strived to create a synergistic blend like no other product on the market - a combination of six select herbs & botanicals that together completely unlock the potency of amalaki.

It's What's In The Bottle!
